

POEM ASOM OCTOBER 2013

We've been renewed and filled with awe
At the end of school number twenty four
Truly a most remarkable week
Where more of God we came to seek

The Sunday started with **Howie Baker**
An awesome word, a heavy shaker
He read from Isaiah fifty four
And challenged us to go for more

While the barren is told to bring forth a song
She'll stay unfruitful if her singing is wrong
You'll have to enlarge the place of your tent
If you want to claim that you have been sent

He urged us to rise from our comfort zone
That place where we hide, safe and alone
No matter how loud you're singing and or clappin'
One thing's for sure – shift will happen

He also started on Monday morning
And gave us all a sturdy warning
Remember when, to the table you come
Make sure your enemies are left at home

Thamo, in opening this special school
Clearly laid down the golden rule
You don't move around or go for a leak
So pray for the break if your plumbing is weak

He spoke about our forward movement
And why there must always be improvement
We have to live in constant transition
Take up our beds and change our position

For God to clearly be seen and heard
The absolute centre must be the word
That's why, in this season, God's method of choice
Is not the thunder but the still, small voice

There's something that the apostolic must find
It's locked up in the word "remind"
Instead of man being strong and anointed
The fall has left us mentally disjointed

God always works in circular motions
Just like the movement of the oceans
And so His purpose will be defeated
If you start the next orbit with the first uncompleted

This is a season of equalization
Where we'll witness tremendous acceleration
Bringing the harvest into pentecost
Restoring the earth, reconciling the lost

How will we show Christ to every nation
Except through exact representation
The total sum of our apostolic worth:
Build heaven's design here in the earth

So if the Lord you get to know
Your stature in the earth will show
For every man and nation to see
That as He is, so are we

If you stay connected to apostolic grace
You'll keep on seeing more of His face
And so the story of Siloam is told
You'll always become what you behold

This orbit in God has a wonderful vibe
It's time for the function of the scribe
These sent ones will bring a new directive
And help us to see from heaven's perspective

The house of David will become the design
For the whole of God's apostolic line
From Judah it's always his family
That's destined, exactly like God to be

So God is not after our unity
It's oneness He wants from you and me
His uncomplicated simplicity
Stands directly opposed to democracy

This wonderful body just has no flaws
It's not like a cupboard with different draws
We have to grasp this with our hearts
This one God is not a collection of parts

When the Bible says that God is love
He does not get it from a little white dove
All of these fables will come to a halt
When we understand the idea of "gestalt"

So we now can appreciate the words of the Son
When He said that He and the Father are one
And in this family, if with Christ you have died
You live for the body to be reconciled

Gentleness, lowliness and humility
These are the things God wants to see
One body, one Spirit, one Father of all
Where everyone shares in the heavenly call

So, to be one, we must learn how to cover
Go ask mister Ham or Ruben the lover
And also how to give greater honour
To the one regarded as a minor

Just as Achan brought a huge calamity
Upon every member of his family
The whole of a nation would suffer demise
When their king, God's orders, would despise

So man to God will always relate
From the vantage point of his current state
He then describes the One he has met
According to what, from Him, he could get

Now kakos is another word
That should rather not be heard
It somehow leaves a very bad smell
And opposes love, that you can tell

There is a higher place than son
On a level where we have become one
The last location before the journey's end
And this position is called a friend

Hebron is the appointed place
No wonder it means 'a city of grace'
You may have loved with the words of your lips
But here you deal with relationships

A friend will be at the bridegroom's side
To prepare for him a beautiful bride
He looks at the interest of another
And really sticks closer than a brother

The patriarchs, in Hebron, found their grave
The way of the nations they did pave
Here you will face your final test
Before you can come into Zion's rest

If you conquer Hebron you can have peace
Wholly following God lets your warfare cease
Then the next location your spirit will stir
And you'll want to move and take Debir

Here all the mysteries will be simply shown
But it cannot be taken by brute force alone
Then there is Arba with wonderful stature
The perfect man with a four-square nature

We also have Anak who is Arba's son
The long-necked and the confident one
He has a first-born whose name is Sheshai
And he's always asking: "who am I?"

The second one has to do with your brother
It always seeks to lift up another
The last has to do with your formation
Where you wait until sufferings turn to celebration

So do not get attached to things
You'll see how much this season brings
But your Lot you will have to leave behind
If the place of Hebron you want to find

There's also the spirit of the Kohatite
To help us get this whole thing right
Otherwise Hebron might bring your demise
If you look at it through Absalom's eyes

When David lamented the lovely ones
The song of the bow was all about sons
From the book of righteousness you sing
About the Lord's anointed fallen King

David was so much like our Saviour
Not looking at Saul's demonic behaviour
Though he hunted him down like a raging bull
He still was described as beautiful

To be a repairer of the breach
You just will have to perfect your speech
And this is really in your song
Where grace will cover all the wrong

Through our testimony we come to prove
That auntie Rahab can marry this move
It all has to do just with plugging in
If you miss it you'll wonder what could have been

How will we mend a church so torn
It's in Hebron where the sons are born
Don't seek the solution in the government
It will only come through covenant

To stand in the ministry of prayer
The priesthood will have to take us there
It's the interface between heaven and earth
So the priest had to be of natural birth

This means that he first had to be a son
With the mindset of the heavenly One
Christ will be first-born **IN** many brothers
And they will bring healing to all the others

A high-priest must be dispossessed
And yet be in a position of rest
As apostolic, representing the king
As a priest you lay down everything

When God, in His wisdom, rent the veil
The occupation of Levite was up for sale
His grace and mercy was so abundant
And the work of Aaron became redundant

Remember it's only the High Priestly call
That could stand in the holiest of all
But now it's been opened for everyone
So Melchizedek cannot be Aaron's son

It's only as a son you can pray
As "created" you have nothing to say
You'll beg from the view of your mortal birth
But as High Priest you'll stand and manage the earth

He acts on behalf of the Father here
Bringing the sacred into the fallen sphere
Until the final reality
Where all returns to immortality

This realm's called 'seated in heavenly places'
The eternal that a priest embraces
It takes the lion and the lamb
To represent the great "I Am"

And so this priesthood can only give life
'Cause it does not know any mortal strife
At the river of Jordan God did not say
This is my Priest who will be the way

So Noah was a righteous man
And through his line would continue the plan
From his loins Melchizedek would stem
We saw it could be no other than Shem

Shaun then came and told us the story
Of the earth restored to its former glory
Time only started after the fall
'Cause eternity was meant to govern all

Throughout the scriptures the rule stays the same
It's when God breathed that man became
So dust can only start to live
When its Maker decides His breath to give

It makes no difference how you count your worth
God only sees two men in the earth
So you have to confess Him as your Lord
If you want to receive the breath of the word

The reason why the word must be spoken
Is because the image of God has been broken
So we went to the schoolmaster's picture book
To see how a first-born son should look

This kind of son must be very sharp
When others throw spears they play the harp
Dishonouring headship is never allowed
The song of the bow is taught to the crowd

To function as a royal priesthood
Eternity has to be fully understood
Then we will live from the timeless zone
And only represent the throne

When we live in the order of Melchizedek
We'll stand with our foot on the enemy's neck
As the first-born son with double portion
Our words will be clear, without distortion

It's really our mouths that will be double
This is the start of the devil's trouble
For from our lips the "dabar" is decreed
And will be effective in mission and deed

This is how we'll know that we've grown
Our speech will line up with the throne
We will discern our spiritual day

No more a case of "you say but I say"

And so the work of Christ's intercession
Is to be the High Priest of our confession
His heavenly role of mediation
Is based on the speech of His holy nation

This order's not based on human birth
It's about possessing heaven and earth
Abraham gives it the right to the land
While David rules through Judah's hand

We saw the battle of the seeds
And to what extremes this warfare leads
The same old story, it's never fresh
The Spirit persecuted by the flesh

From Abraham to David to Jeremiah
It's about the coming of the Messiah
If it can't be wiped out, get the picture
It will be polluted by a mixture

To get this seed to maturity
God's always defended its purity
But it just cannot stay protected in satin
So we start to see a brilliant pattern

While the first-born is usually not progressing
God takes the second and gives him the blessing
And so begins the age-old strife
That has even cost a brother his life

It all has to do with the first-born son
The Christ in Whom we all are one
But although we've all been justified
On earth we still need to be sanctified

The work of the cross must be appropriated
And our departure has to be activated
This will not be achieved by moaning
But by the Spirit's inner groaning

There are some first-born identifications
Signposts that point to these relations
All these things carry something so true
The world will not have the last say about you

Sagie told us of the favour to come
And the difference it will mean to some

And if you have this wonderful thing
An "unfair advantage" is what it will bring

So in this frequency you'll get connected
To those whom God for you has selected
Even your giants will be defeated
And the people of God differently treated

The dogs won't even bark at night
In Egypt's darkness, Goshen has light
A difference upon the church will be seen
Acceleration as there has never been

This principle operates everywhere
A camera capsule that lays you bare
To every sceptic who not yet believes
Just ask King Solomon about his leaves

You'll have to show the tenacity
To change your engine's capacity
From a tuc-tuc travelling on the bi-way
To a four-wheeler cruising on the highway

You might not think this could be true
But ants all greet with a high five or two
You might be driving, but miss by far
If you don't have the full control of the car

This favour is something you cannot hide
So when it shows up, just enjoy the ride
With it will also come greater maturity
And a stronger desire for purity

We heard about the placebo effect
And how it will try to fool the elect
Your victory over this soulish dimension
Is determined by the price of the injection

Where maturity is out of the question
You'll see the power of suggestion
It will even make some people presume
What they're smelling must be real perfume

An important thing is humility
Another is honouring authority
Do not discard the power of seed
It will come to your aid in the hour of need

So on this journey of accelerations

We went to visit some important stations
We also heard about new inventions
And saw the need for diversifications

So please don't violate the copyright
Of the New King James if it's in your might
But how will they ever come to find
The verses settled in your mind

The difference between oneness and unity
Was opened up clearly for all to see
Through a church that was living in the past
Until it was freed by Jesus at last

This church was involved in deep intercession
So Jesus gave it an apostolic commission
When the pigs all drowned and gave up their breath
The end of this union could only be death

We looked at the New Jerusalem
The trees and the zoe life in them
Even the glory that with it goes
It's all about where the river flows

This means that the word is back in the middle
And the city church completes the riddle
So back to the garden we cannot go
'Cause there's a snake that spoils the show

While the law of Moses had many commands
The ehad of God has four demands
But something that's not in the end of the book
Is the name of your church, gone have a look

Christ has no place, His head to lay
His body will be the only way
God's people don't realize, and it's a pity
That we're talking about the church in the city

The Jews had to hear, understand and do
The cherubims tell the story too
The face, the eyes, the hands and feet
For the glory to come they had to meet

We will remember, when the parachurch fades
That the bride does not have any maids
From Samson's mindset we have to migrate
And come to David, that's our mandate

We looked at the problem of Romans seven
And how the Spirit gives life from heaven
All condemnation is taken away
When we follow His leading every day

To walk in the Spirit is not mystical
Just agree with the Word, it's so practical
The church of Acts did not think it a joke
When apostles talked, the Spirit spoke

So Paul's demonstration of spirit and power
Has nothing to do with the man of the hour
He simply lived a life that was righteous
His reputation was pure and blameless

The Holy Spirit inside us is yearning
Because we've become so slow of learning
This life is not designed for our leisure
But to bring us to Christ's stature and measure

Don't let them take you for a ride
You only have one spirit inside
The DNA of God will prevail
It carries a code: "I cannot fail"

The problem is our spirit's size
We've never taught it to arise
While it operates on revelation
Logic and knowledge is not its foundation

You have to restore your spiritual passion
And sow to the spirit in a biblical fashion
Then come to a place of being nothing
Offense is a sign you thought you were something

A brand new speaker at the school was born
When **Ralph** explained what was said by Shaun
We'll have to know how to fill the gap
Between arising and shining, or it could be a trap

To set up a way in which others should walk
Apostolic leaders have to live what they talk
It's the laying out of a heritage
For us to enjoy apostolic privilege

When Timothy was called Paul's beloved son
He got the name of the first-born One
You can know your father so well, but rather
You should come to know your father's Father

And so, for us to fill that gap
We had a look at David's map
We searched out some important things
'Cause his legacy in our ears still rings

From the house of Saul, driven out by force
He connected to his prophetic source
He also knew that Goliath's sword
Could accelerate him in the Lord

Sentimental connections will delay your start
And limited resource will test your heart
And when you receive a prophetic word
Be quick to act on what you've heard

To go into battle is not your choice
You need the clarity of God's voice
To keep your anger from spoiling your life
He could even be speaking through your wife

If you do not want to become disjointed
Please do not touch the Lord's anointed
Consider the body of high esteem
Don't braai when your enemy loses steam

Learn to sing the song of the bow
Strengthen yourself when spirits are low
And lastly, this we learned from Ralph
You have to know how to hide yourself

So now, as we realize this is the end
We hope you'll leave here as a friend
It's always a moment to lament
But remember, from here you have been sent
